

# AirMed

FIJI

Helipro Fiji have for many years coordinated medevacs from Fiji to Australia and New Zealand. However, due to the time needed to fly a medevac jet into Fiji and then out again, patient's recovery times were extended and at times did not survive.

With this in mind, Helipro introduces a new long range international Medevac Jet service based in Fiji, that has a nonstop range of 2,4000 nautical miles.

## **NO MORE LONG WAITS FOR AN OVERSEAS MEDEVAC JET**

**Fiji – Auckland 03.05 Hrs**  
**Fiji – Brisbane 04:30 Hrs**  
**Fiji – Sydney 05:40 Hrs**

**Call +(679) 770 7700 for 24/7 Emergency Assist**

**AirMed takes care of all medical reports and insurance guarantees.**

*Flight times are subject to atmospheric conditions*

For patients requiring a commercial jet flight, Helipro provides a Wing to Wing or Walk On Medical Escort Service ensuring that, during flight, the patients every need is meet.

Helipro also coordinates all aspects of the medevac both in country and destination country.

For patients that require inflight stretcher care an Ambulift trucks is used to ensure that patients can be safely uplifted.

At the point of destination, Helipro organises an on tarmac ambulance transfer ensuring minimal delays in getting the patient to hospital and specialist treatment.

The AgustaWestland 109 MedEvac helicopter is an internationally acclaimed high performance twin engine, air conditioned helicopter with a cruising speed of 152 nautical MPH. Equipped with a Spectrum AeroMed platform, allows continuous patient care and monitoring.

AirMed's Road Ambulance is air conditioned and fully equipped ensuring a seamless transition from Air Ambulance, Hospital and MedEvac jet.

*Like any emergency team throughout the world, our team of highly trained professionals are always ready to deploy every moment of every day, whether there is an emergency or not.*
